

Mandrel holder trolley with clamping device

Designed for an easy and well done Speedwell Sleeve (and/or Flexo sleeves) change on the service mandrels. The mandrel is clamped by a manual device through a rotation of an excentric and later on connected to the compressed air circuit for assembling or dismounting the sleeve that is removed from the front side. This device is normally placed in an area equipped with a crane for elevating the mandrel from the trolley and its positioning in the clamping device.
